

Swiss SafeLab M.ID Server - Advantages by comparison

Previous solutions	Solution with Swiss SafeLab M.ID
<p>Token device forgotten, lost, damaged or not on you - no access!</p> <p>USB-Dongle Devices as well need space on the key ring, in your pocket, can be damaged, can be lost or can be forgotten.</p>	<p>M.ID doesn't need any additional hardware. As ownership factor existing cell phones, email capable smart phones / tablets or app capable smart phones / tablets can be used.</p>
<p>Devices have to be managed by IT-Specialists: assigning serial numbers, maintain lists, stock area, Device stock value, order time for new staff. Devices often have the username inscribed – this increases logistics and storage costs and time as well...</p>	<p>In case of mobile phone loss or damage, backup scenarios are provided (for example an alternative delivery of passcodes), so that high secure logins are still possible.</p>
<p>Hardware Tokens as USB-Sticks, Smartcards, Dongles cannot plugged into foreign devices (Internet Café, Tablets)</p>	<p>M.ID doesn't use any hardware which has to be plugged in somewhere.</p>
<p>Devices need installations on servers and on client devices, they need hardware configurations and maybe dedicated servers are needed as well.</p>	<p>Swiss SafeLab M.ID Server is installed as a background service on existing server infrastructure. Usage of existing user directory: Desired users can be activated immediately after their mobile phone number was set in your user directory.</p>
<p>New users often have to wait for their hardware tokens, because they mostly have to be delivered securely and by post.</p>	<p>Swiss SafeLab M.ID Users can be activated immediately for any desired time period.</p>
<p>Time span from installation until ready to use: Mostly several days</p>	<p>Swiss SafeLab M.ID is up and running for any desired user at the same day (the integrated tools enable you to activate any desired amount of users at once).</p>
<p>Annual license fees plus upgrade costs.</p>	<p>M.ID = one-time license costs with an unlimited length of time usage, only new versions has to be purchased unless a subscription advantage (SA) was bought.</p>
<p>Multiple devices, handling is complicated, often training courses are needed to learn handling and correct use, system and devices has to be maintained, high system security.</p>	<p>M.ID is very easy to handle, almost no training or maintenance is needed and it's at least this secure as other solutions.</p>
<p>Prices are often far above CHF 5,000.00 because of additional devices, hardware installations, client and hardware maintenance.</p>	<p>Prices already starting from CHF 500.00 No unnecessary costs for devices or hardware installations. There's no client maintenance!</p>
